

### Example – Use Case:

A stakeholder of the company "Tandil SRL," which specializes in the commercialization of auto parts, requires the services of AtomChat to provide new customer engagement channels and virtual assistance through artificial intelligence.

For this reason, they wish to contact AtomChat to explore the products and various payment methods available for their case. Upon entering the AtomChat bot interface, they will need to fill in basic information, such as:

The image shows a registration form for the "Atom Voice Agent". The form is set against a dark blue background. At the top, the title "Atom Voice Agent" is displayed in a large, bold, white font. Below the title, there is a section for selecting an avatar, labeled "Select an Avatar:". A dropdown menu shows "Avatar 1" with a downward arrow. Below the dropdown is a circular avatar image of a person with dark skin and curly hair, wearing a blue shirt. Underneath the image is the text "Avatar 1". The main form area contains several input fields: "Enter your name" (a text input field), "Enter your company" (a text input field), "Select a Country:" (a dropdown menu showing "Afghanistan" with a downward arrow), and "Estimated Budget (in dollars)" (a text input field with the value "100" and minus/plus buttons). A "Submit" button is located at the bottom of the form. Below the form, a message reads: "Please fill in the form to start the chat."

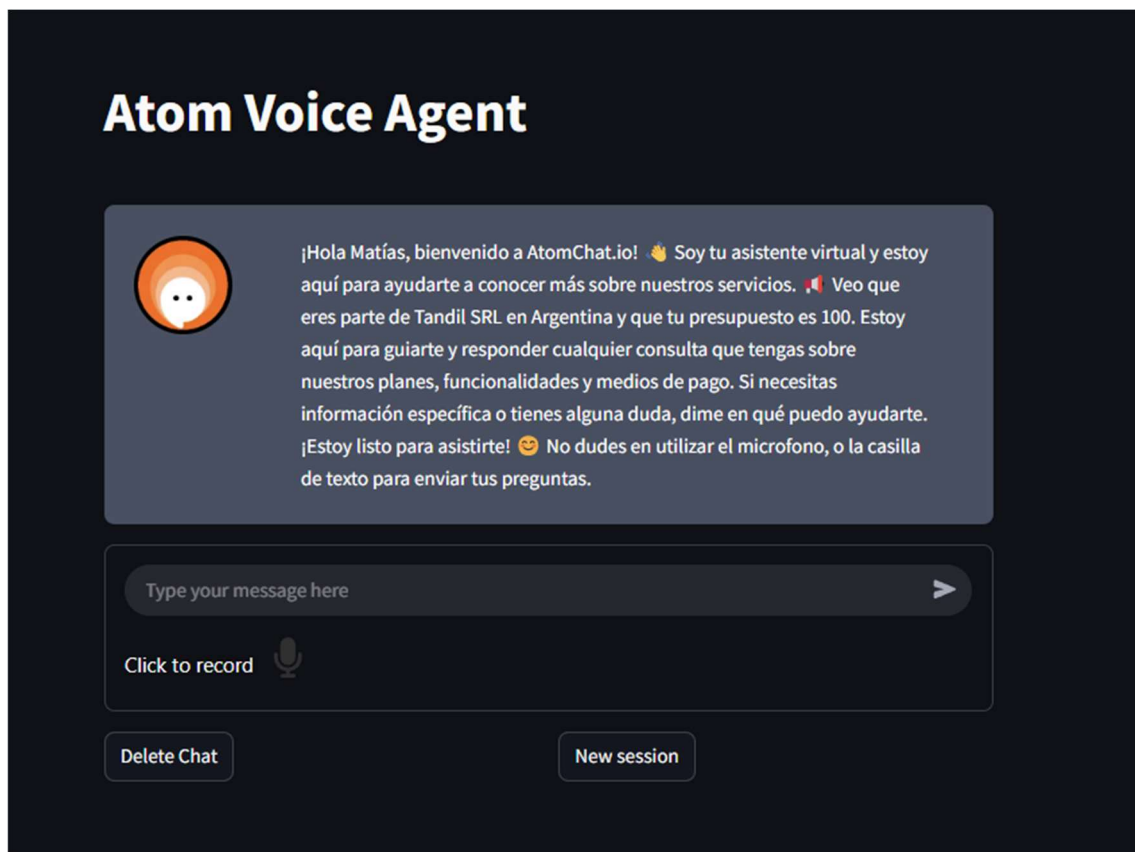

Important: If you put an invalid name, the system will required to fill again. For example:

The image shows a close-up of the "Enter your name" input field. The text "Matías1232234324" is entered, which is an invalid name because it contains numbers. The input field is a dark grey rectangle with a light grey border.

You must use a real name. It is forbidden to use numbers or special characters.

Once the chat is charged, a bot will communicate with you:

You can communicate using the input text below, or use your microphone if you want. The chatbot also will recognize you, and guide through your questions:

Below, you can delete the current session, or start a new one, saving all the last conversation and insights:

As it can see, in the left side, there is a select input, where you will be able to access to old sessions:
